

AFSVision® eLearning—Train Smarter

Training users is one of the major hurdles when implementing a new system. The learning curve can be steep and delay your return on investment. But with AFSVision eLearning, you can provide your team with comprehensive, self-paced, foundational training on AFSVision to start reaping the benefits of AFSVision faster!

Foundational Training. Unlimited Access. Smarter Implementation. All with AFSVision eLearning.

AFSVision eLearning is a self-contained, SCORM-compliant training solution designed to accelerate user readiness that can be loaded into your own Learning Management System for a unified user training experience. It provides foundational knowledge in key areas of AFSVision—Account Servicing, Post-Approval Workflow, Loan Administration, and One Stop Inquiry—through self-paced, online training modules.

Why Invest in AFSVision eLearning?

Faster Time to Value

By equipping users with the knowledge needed, institutions can reduce ramp-up time and start realizing the benefits of AFSVision sooner. In addition to initial training before you go live on AFSVision, the courseware is ideal for onboarding new hires in AFSVision's core areas at no additional cost after the initial investment.

Reduced Training Burden on Internal Teams

AFSVision eLearning prepares users before instructor-led sessions, allowing those sessions to focus on your institution's specific processes. With pre-built, expert-designed modules, your internal trainers and Subject Matter Experts can focus on institution-specific processes rather than basic system education. And the product includes sample job aids and documents that can be used to guide your own internal job aids that concentrate on your procedures.

Consistent, High-Quality Training

Every user receives the same standardized instruction, ensuring consistency across departments and locations—especially important for large or distributed teams. The courseware also includes assessment questions for tracking progress and comprehension.

Scalable for Growth

Whether you're onboarding 5 or 500 users, the AFSVision eLearning modules scale effortlessly without additional cost or coordination. And if you experience turnover in your staff, there's no additional cost for new users to access this through your own Learning Management System.

Enhances User Confidence and Satisfaction

Users who understand the system are more confident, productive, and less likely to make costly errors—leading to better morale and fewer support tickets.

Ideal for Hybrid and Remote Workforces

Online, self-paced access makes it easy to train users regardless of location or schedule, supporting modern workforce flexibility.

Key Benefits

- **Accelerate User Adoption:** Reduce the learning curve and get your team up to speed faster with structured, foundational training for testing and production.
- **Unlimited, Cost-Effective Access:** One-time fee includes unlimited use—no seat licenses or recurring costs.
- **Flexible Integration:** SCORM-compliant files integrate seamlessly into your Learning Management System (LMS).
- **Future-Ready Foundation:** AFSVision eLearning courseware covers core concepts that remain consistent across versions, so you can get new team members up and running faster.
